

Stimula™

Pinot Noir

Description

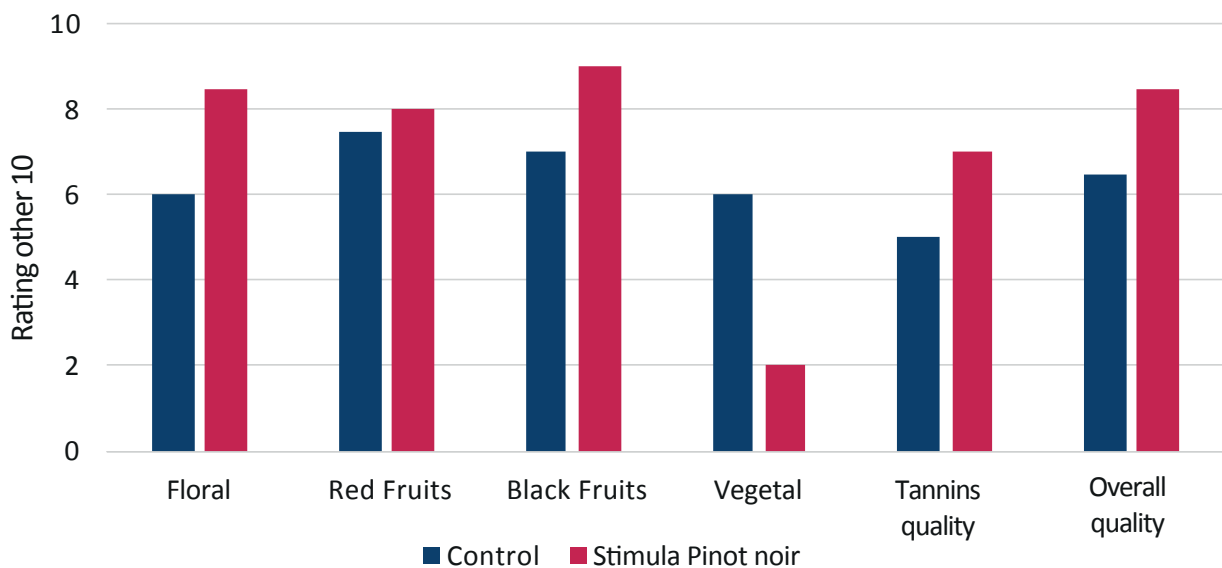

Stimula™ is a new range of 100% yeast autolysate products developed to supply the optimal levels of organic nitrogen sources in order to optimize yeast metabolism and to promote the aromatic profile of different grape varieties.

Stimula Pinot Noir™ is particularly rich in different nitrogen sources (free amino acids), specific vitamins and minerals to increase the aromatic profile while avoiding sulfur off-flavors.

The addition of **Stimula Pinot Noir™** at the beginning of the alcoholic fermentation (AF) will enhance yeast metabolism, increasing varietal precursors uptake, and aroma biosynthesis.

Benefits and results

- Improve the expression of varietal aroma.
- Enhance the synthesis and stability of noble fruity esters.
- Reduce greenish and vegetal notes.
- Avoid reductive characters.

Sensory analysis conducted by an expert panel (March 2021). Comparative trial on a Pinot Noir wine (Krems, Austria) no addition vs **Stimula Pinot Noir™** added at the beginning of AF.

Dosage and instructions for use

- **Stimula Pinot Noir™** is a nutrient supplying highly available amino acids, peptides, vitamins and minerals.
- Recommended dosage is 40 g/hL added at the beginning of AF.
- **Stimula Pinot Noir™** should be suspended with water (1 kg in 10 L water) and added immediately to the tank. If prepared in advance, re-suspend the product prior to its addition to the fermenter.

Packaging and storage

- 10 kg (10 x 1 kg bags).
- Store in a dry environment below 25°C.
- Shelf-life at the recommended storage temperature is 4 years from production time.
